Learn the Art of Aesthetics

Program OVERVIEW

The **Aesthetic Dentistry Masterclass** is an intensive, skill-enhancing workshop designed for clinicians aiming to elevate their proficiency in modern smile design. This program blends focused theory with hands-on training to refine essential aesthetic techniques including **veneers**, **bleaching protocols**, **anterior composite artistry**, and **advanced dental photography**. Participants will gain practical expertise, clinical confidence, and artistic precision to deliver naturally beautiful, high-quality aesthetic outcomes

Learn the Art of Aesthetics

Competency BENCHMARKS

- Build a strong foundation in aesthetic treatment planning, material selection, and smile design principles.
- Master veneer case selection, preparation, impressions, temporization, and predictable bonding workflows.
- Learn advanced composite layering, shade matching, characterization finishing, and polishing for natural anterior restorations.
- Gain hands on expertise in partial bonded restorations, including inlay/onlay preparation, temporization, and bonding.
- Understand tooth discoloration types and confidently perform vital/non- vital bleaching, abrasion techniques, and resin infiltration for effective shade management.
- Acquire essential dental photography skills for superior case documentation, including camera selection, settings, lighting, & intraoral/extraoral imaging
- Build clinical confidence through guided demonstrations and hands-on practice across veneers, composites, bleaching, and photograph

Curriculum DESIGN

LECTURES

Expert-led sessions delivering core concepts in aesthetic dentistry, including veneer protocols, composite layering, bleaching, dental photography, and partial bonded restoration techniques.

DEMONSTRATION

Live clinical demonstrations showcasing veneer preparation, composite characterisation, onlay/overlay procedures, bleaching methods, and dental photography workflows for predictable aesthetic outcomes.

HANDS-ON TRAINING

Guided practical exercises enabling participants to refine skills in veneer preparation, anterior composite restorations, partial bonded restorations, bleaching procedures, and standardised photographic documentation.

CASE DISCUSSION

Interactive review of real aesthetic cases to strengthen diagnostic judgment, treatment planning, material selection, and decision-making for successful smile transformation.

AESTHETIC REVAMP –
Learn the Art of Aesthetics

Topics Covered

Veneer preparation & bonding protocols

Anterior composite layering

Biomimetic restorations

[onlay, overlay, table top etc]

Bleaching & Dental Photography

LIVE PATIENT DEMONSTRATION

COURSE FEES - RS.32,000/-

Introduction to Aesthetic Dentistry

Lecture on Veneers

- Indications & Contraindications
 - Case Selection
 - Preparation designs
 - Selection of materials
- Veneer fabrication materials and techniques
- Finish line margin, Retraction cord and its placement methods.
- Impression materials & Techniques
- Temporisation

Veneer Preparation Demonstration

Veneer Preparation Hands-on

Lecture on Composite Layering

- How to choose Etchant, Adhesive and Composites?
 - Shade matching for composites
 - Light sources and its advancements
- Anterior Aesthetic Restoration – Stepwise protocol
 - Midline Diastema closure
 - Class IV or Ellis fracture restoration
- Complete Finishing and Polishing products & protocols
- Recent materials and concepts available in composite restorations.

Demonstration on

- Composite Layering & Characterisation
 - Finishing and polishing strategies.

Hands-on Practice – Composite layering, F
inishing and Polishing on Ellis class II Fracture model

Lecture on Partial Bonded Restoration

- Case Selection
- preparation techniques and armamentarium
- Impression and temporisation for Inlays and Onlays
- Finishing and Occlusal adjustments, Posterior Bonding protocols

Demonstration, Preparation for Onlay/ Overlay

Handson Partial Bonded Restorations(Onlay/Overlay) Preparation

Lecture on Veneer bonding Protocols And Isolation

- Bonding Protocol
- Choice of bonding agents and adhesives
- surface treatments for tooth and veneers
- how to choose Luting Cements
- classification of Cements
- various commercial available resin luting cements
- dam isolation techniques

Demonstration on anterior veneers bonding and surface treatment

Lecture on Bleaching / Tooth Whitening

- Know about the different types of discolouration
 - How to choose bleaching material?
 - Understand the mechanism of bleaching
 - How to differentiate various discolouration
 - How to manage fluorosis stains?
- How to increase overall darker shade into lighter shade
 - Resin Infiltration technique

Case Discussion on management of discoloured tooth .

- Vital bleaching
- Non Vital bleaching
- Micro and Macro abrasion
- White spot lesion management
- Resin Infiltration technique
- Combination therapies for severely discoloured dentition.

Demonstration - Vital Bleaching & Microabrasion

Lecture on Dental photography

- Basics about photography
- learn how to document your case
- Know about camera body , lens , flash
- How to choose the best camera set up for dental photography
 - Know the settings and how to play with your photography stuffs
 - Macro photography
 - Profile photography

Accessories for better photographs

- Editing and post processing

Demonstration - How to take intraoral and extraoral photographs on patients

VALEDICTORY & CERTIFICATE DISTRIBUTION
